 - ▶ Getting the 'best' regression model

Regression model

- ▶ Simple Linear Model

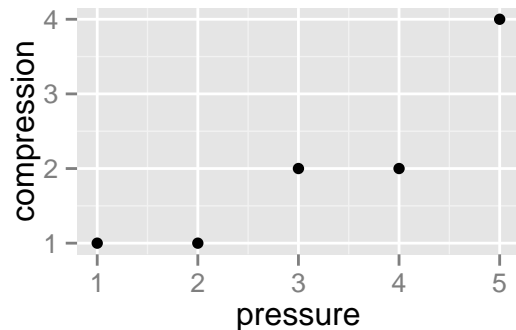

$$y = \beta_0 + \beta_1 x$$

- ▶ Simple Linear Regression Model

$$y = \beta_0 + \beta_1 x + \epsilon$$

Correlation is usually not perfect.

##	pressure	compression
## 1	1	1
## 2	2	1
## 3	3	2
## 4	4	2
## 5	5	4

It's hard to draw a line
